

# RGR Acril-GFRC Enhancer

*Regular and Green*

## |Description|

RGR Acril GFRC Enhancer is a pure acrylic copolymer emulsion that improves the physical characteristics of cement materials, such as GFRC products. RGR Acril GFRC Enhancer improves the working characteristics of materials. It also enhances composites, eliminating cracking in GFRC production.

## |Usage|

RGR Acril- GFRC Enhancer eliminates the need for the usual 7 day post cure.

It is an emulsion used as a cement additive with a long history of success in Europe and North America in coatings

## *Technical Specifications*

<b>Solids Content</b>	<b>51%</b>
<b>Brookfield Viscosity</b>	<b>100 cps</b>
<b>Tg</b>	<b>+15°C</b>

## Film Characteristics:

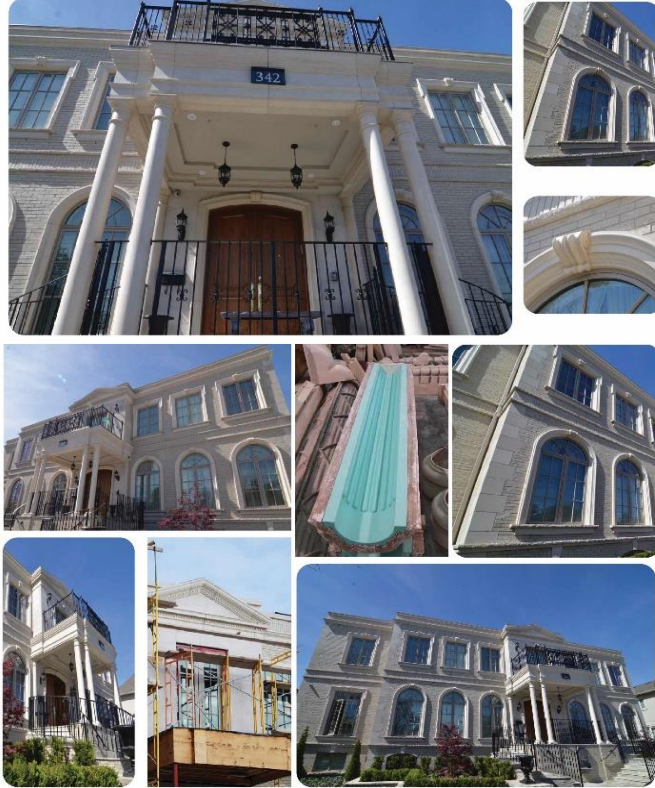

- Transparent
- Flexible
- Non-tacky
- Bright

RGR Acril-GFRC Enhancer is a pure acrylic emulsion and does not contain any SBR (Styrene-Butadienne Rubber) .

### |Packaging|

18.9L (5 gallon) Pail | 55 gallon  
Drum | 1,000 liter tote

### |Storage|

Stable between +5°C - +40°C for up to 12 months

### |Warranty |

R.G. Rumbolt and Associates/et Associés Ltd warrants RGR Acril-Overspray to be free from manufacturing defects and R.G. Rumbolt and Associates/ et Associés Ltd's liability is limited to replacement of defective material. The warranty is disclaimed when issues occur due to weather created problems, such as freezing and extreme heat, that the installer has not taken precaution against. Other problems such as improper product application will cause warranty disclaim.
